SASS (6.4)
School of Education Clinic (397)

PLEASE NOTE:
Sign types W50 and W51 are shown both in the Building Identity Survey and the sign location plan.
CAMPUS WIDE SIGNAGE
The hundreds of signs on the UCR campus not only provide important information; they collectively form powerful and lasting impressions of the University and campus environment. Each sign should be considered a direct message from the administration and each is an opportunity to communicate clearly and present a positive image to students, faculty, staff and visitors.

Intent
Signage and graphics design guidelines seek to unify and improve all signage on the campus by:

- Organizing campus signs into useful, integrated categories
- Standardizing materials, colors and type styles
- Setting scale and size formats
- Creating appropriate relationships to landscape, architectural and lighting elements
- Selecting appropriate design details
- Organizing wayfinding

Campus signage has been organized into the following functional groups:

Monument & Entry Signs
Substantial monument signs will be designed and located at key entrances to the campus. Those entrances are identified as:

1. University Avenue & West Campus Drive
2. Martin Luther King Boulevard & Chicago Avenue
3. Canyon Crest Drive & Martin Luther King Boulevard
4. Big Springs Road & Valencia Hill Drive

For the main entrance signs, permanent, monumental materials such as natural stone and metal will be used to present a formal, welcoming appearance. The signs will be illuminated by remotely mounted fixtures. Letters may be fabricated of metals or incised into the surface of the monument.

In addition to the monument signs, a pylonsign of significant height and visibility will be located adjacent to the freeway. The purpose of this sign is to identify the UCR campus for freeway drivers and to provide an opportunity for University announcements of events. A high resolution LED screen will be incorporated into the pylon, providing a methodology by which the University can communicate directly with the community.

Vehicular Directional Signs and Parking Identification
A system of vehicular signage will be designed and deployed throughout the campus roadways and parking areas. The vehicular sign system will be comprised of directional signs, parking identification signs and street name signs. These signs will display important and “reachable-by-car” campus destinations, and adjacent parking areas, with directional arrows. The signs will be highly visible and recognizable from over 150 ft. where sight lines allow. (Drivers should always be able to see at least one directional sign from anywhere on the campus roadway, thus providing substantial driver reassurance.) The type style should be Trade Gothic Bold No.2 for clarity and easy reading by drivers with corrective qualities for night reading.

Pedestrian Directional Signs
A system of pedestrian-directional signage will be designed and deployed throughout the campus. The directional signs should display important and frequented campus destinations with directional arrows. The directional signs will be a “finger-sign” or pointer style design that features pointed slats for each destination. Signs of this style are very pedestrian friendly and are less prone to vandalism. The height of these signs will be eight to ten feet. The type style should be a simple, bold sans-serif font for clarity and easy reading. Wording on the signs should be simple and use the shortest messages possible. The formal names of some destinations may need to be shortened for effective display on signs.

Pedestrian Map Directories
A system of map directories with lighting for night reading will be designed and deployed throughout the campus presenting an illustrative campus map and detailed listing of all destinations. The directories will present a clear, colorful map, matching that of printed hand-out maps. Maps will be easily changeable to allow for regularly updating campus information.

Information Kiosks
Interactive kiosks will be installed for the display of campus information. Information links within the kiosk software can help foster communication, student interest and help build community on the campus.

Freestanding Building Signage
A system of free-standing building identification signage will be designed and deployed throughout the campus. Each sign will display the formal name of a campus building and be located near the main building entry door. The signs should be highly visible and recognizable from over 200 feet where sight lines allow. These signs will reflect the University’s blue and gold coloration, but will feature a more architecturally sensitive neutral background color. A letter size of approximately two to three inches will be used. The type style should be Trade Gothic Bold No.2 for clarity and easy reading.

Building-Mounted Signage
Building mounted signs will be comprised of three categories: architectural letter signs, panel signs and door mounted signs. These signs are to be used in a variety of configurations in order to provide adequate visibility and identification for the building. Architectural letter signs are to be used to prominently identify buildings, generally at or near the top of the structure. Letter size and location should be appropriately scaled and proportioned to the overall building. Panel signs usually at eye level or slightly above, should be used to supplement the architectural letter signs where building identification is required closer to the entry path. Door mounted signs shall be applied to all main building entry doors. These signs shall be applied vinyl letters applied substrate to clear glass.

Design Considerations
A wide variety of design approaches and opportunities exist for the signage at UCR. However, while the designs can be simple and understated, or play a more dramatic role, a contemporary, clean-line approach should be used. The buildings of the University are an eclectic mix of architectural and design styles. Signage will be designed to complement and help unify the campus’s diversity of styles.

Interior Signage
A system of interior signs has been developed to give consistency to the location, size, materials and color of the graphic elements within buildings. Directional signage, room number identification, building and floor directories, and all code required signs shall be laid out and located in accordance with the new Interior Signage Guidelines.

Color and Contrast
With its large scale, open spaces and long sight lines, the campus needs highly visible and recognizable signs. The use of bold and high contrast colors and materials will help signage elements stand out in the environment. Directional signage will reflect the University’s school colors of blue and gold with sign messages in white. Monument signage will be constructed using a more architectural palette of natural stone and metal finishes.

For more details, please consult the Campus Sign Program, posted on the UCR Capital and Physical Planning website. (www.urap.ucr.edu)
### PROJECT TYPESTYLES:

**ABCDEFHIJKLMNOPQRSTUVWXYZ 1234567890**

Fabricated aluminum frame structure with stone facing. Dark red / brown facing to be morning glory stone with oil rubbed finish. Light ochre / brown facing to be sunflower stone with oil rubbed finish.

Arida fluorescent outdoor architectural lighting. Sign Contractor to minimize fixture above grade as possible. (or equivalent lighting product)

Concrete footing / integral colored mow pad to be determined by Sign Contractor’s engineering.
Stainless steel "Z" clips / brackets with fasteners to support stone.

2" x 2" x 1/4" steel angle welded frame structure to support stone and electronic message display.

4'-0" x 11'-4 1/2"

3" square steel tubes with 3/8" thick bottom plate. Verify with Sign Contractor’s engineering. Perforated aluminum around display for venting painted black.

Threaded stainless steel studs / anchor pins with masonry holes filled with epoxy sealant.

Leveling shims.

Stone panel to cover message display opening in single faced signs.

± 4" Aluminum channel welded support framing.

For single faced displays cover message display opening with stone panel and eliminate exterior lighting on back side only.

Flush aluminum service access for message display controller. Venting for excess heat to be determined by message display manufacturer. Use tamperproof fastening or locking device for panel access.

Flat cut out horizontally brushed stainless steel letters with 1/4" stainless steel spacer sleeves and blind stud.

Fabricated aluminum frame structure with stone facing, stone facing. Light ochre / brown facing to be sunflower stone with oil rubbed finish.

Full colored L.E.D. video board with high resolution picture quality remote computer controlled display. Manufacturer and model specifications to be determined. Opening dimensions to be determined video display manufacturer.

Fabricated aluminum frame structure with stone facing. Dark red / brown facing to be morning glory stone with oil rubbed finish.

Primary power to sign location by UCR.
ALTERNATE: SIGN TYPE CAMPUS ID DOUBLE AND SINGLE FACE CAST CONCRETE DETAILS W11.3

For single faced displays fill message display opening with concrete and eliminate exterior lighting on back side only.

Flush aluminum service access for message display controller. Venting for excess heat to be determined by message display manufacturer. Use tamperproof fastening or locking device for panel access.

Covered space for display controller.

Typical 45° beveled edges.

Service access panel with lock or tamperproof fasteners.

Typical 45° beveled edges.

For double faced displays:

Use tamperproof fastening or locking device for panel access.

Covered space for display controller.

Flush aluminum service access for message display controller. Venting for excess heat to be determined by message display manufacturer. Use tamperproof fastening or locking device for panel access.

Covered space for display controller.

Typical 45° beveled edges.

Service access panel with lock or tamperproof fasteners.

Typical 45° beveled edges.

Elevations:

- Flat cut out horizontally Brushed Stainless Steel Letters with 1/4" Stainless Steel Spacers for integral finish and blind nuts.
- Rough stone textured concrete monument with integral finish to match Sunflower light ochre / brown stone oil rubbed finish.
- Full color LED video board with high resolution. Picture Quality Remote Computer Controlled display. Manufacture and model specifications to be determined. Opening dimensions to be determined video display manufacturer.
- Rough stone textured concrete monument with integral finish to match Morning Glory dark red / brown stone oil rubbed finish.
- Mounting hardware determined by message display manufacturer.
- Aluminum cabinet to house controller for message display. Verify hardware requirements and specifications with electronic display manufacturer.
- Perforated aluminum around display for venting and painted black.
- Steel rebar structure inside concrete as required by Sign Contractor's engineering.
- Ansa fluorescent outdoor architectural lighting.
- Sign Contractor to minimize fixture above grade as possible. (equivalent to lighting product)
- Concrete footing / integral colored mow pad to be determined by Sign Contractor's engineering.
- Primary power to sign location by UCR.

Integral colored concrete pad / footing with internal rebars and sign support structure as required by Sign Contractors Engineering. (Davis Concrete color Mesa Buff 2 lbs. 5447.

Concrete footing / integral colored mow pad to be determined by Sign Contractor’s engineering.

Fabricated 2” thick stainless steel “shield” with light horizontal brushed finish. Graphics to be etched 1/32” deep and paint filled.

Fabricated aluminum frame structure with stone facing. Dark red / brown facing to be Morning Glory stone with oil rubbed finish. Light ochre / brown facing to be Sunflower stone with oil rubbed finish.

3/4” thick flat cut out horizontally brushed stainless steel letters with 1/4” stainless steel spacer sleeves and blind studs.

1” deep incised letters with painted Matthews MP10217 Brown. Exterior lighting.
SIGN TYPE DOUBLE FACE LARGE PRIMARY ID W16.1

Primary power to sign location by UC Riverside.

Concrete footing / integral colored mow pad to be determined by Sign Contractor’s engineering.

Arida fluorescent outdoor architectural lighting. Sign Contractor to minimize fixture above grade as possible. (or equivalent lighting product)

Integral colored concrete pad / footing with internal rebar and sign support structure as required by Sign Contractors Engineering. (Davis Concrete color Mesa Buff 2 lbs. 544.)

Fabricated 2" thick stainless steel "shield" with light horizontal brushed finish. Graphics to be etched 1/32" deep and paint filled.

Fabricated aluminum frame structure with stone facing. Dark red / brown facing to be Morning Glory stone with oil rubbed finish. Light ochre / brown facing to be Sunflower stone with oil rubbed finish.

3/4" thick flat cut out horizontally brushed stainless steel letters with 1/4" stainless steel spacer sleeves and blind studs.

1" deep incised letters with painted Matthews MP10217 Brown.

Exterior lighting.

± 4" 1/2 Ø extruded aluminum tube sleeve with milled surface to simulate hexagon with painted finish.

Countersunk tamperproof stainless steel screws (typ. all visible fasteners).

Nylon or neoprene black gaskets.

1" square aluminum channel with 1/4" wall with painted finish.

Nylon or neoprene black gaskets.

4 1/2" Ø extruded aluminum tube sleeve with milled surface to simulate hexagon with painted finish.

Double sided 1/4" thick aluminum flat cut out panels with painted finish and applied 3M Scotchcal white graphics.

All thread metal stud threaded into top plate and welded bracket inside tube.

1" square aluminum channel with 1/4" wall with painted finish.

Nylon or neoprene gray gaskets painted to match bracket. (keep to minimal tolerance)

Placement options for panels.

Nylon or neoprene black gaskets.

1" square aluminum channel with 1/4" wall with painted finish.
3/4" = 1'-0"

Note: All sign surfaces to be sprayed with semi gloss anti graffiti clear coating.

1/8" aluminum fabricated panel with painted finish and 3M Scotchcal computer cut graphics.

1 1/2" x 1 1/2" x 24" aluminum angle, 3/16" wall thickness, mounting bracket top and bottom with countersunk stainless steel tamperproof fasteners.

Stainless steel mechanical fasteners with wall expansion anchors as per wall conditions.

1 1/2" x 1 1/2" x 1/8" aluminum angle welded framing with hairline seams and painted finish.

Note: All sign panel surfaces to be sprayed with semi gloss anti graffiti clear coating.
**LAYOUT OPTION "A"**

1/8" thick aluminum panels with painted finish on all surfaces and 3M Scotchcal computer cut graphics.

Note: All sign panel surfaces to be sprayed with semi gloss anti-graffiti clear coating.

**LAYOUT OPTION "B"**

1/8" thick flat cut out aluminum sign panel with painted finish on all sides.

Continuous welded aluminum channel bracket welded to back of panel and painted to match panel.

Countersunk stainless steel tamperproof screws painted to match panel bracket. (2-minimum required on each side of bracket)

Note: This sign cannot be used within any path of travel. The height from the ground to the bottom of the sign is less than the minimum 80 inches ADA requirement for signs located in a path of travel.
3 1/2” Ø aluminum sphere and 4 1/2” Ø x 1/2” thick aluminum plate, both with painted finish.

Single face fabricated 0.090 aluminum cabinet with 1/4” thick clear lexan face. Cabinet to be painted on all sides with silkscreened logo on header. Cabinet to have interior edge light illumination.

3” Ø x .216 wall aluminum pipe with 8” x 8” x 3/8” welded aluminum plate.

Coat embedded aluminum with alkali resistant bituminous paint.

Concrete footing with integral colored concrete mow pad as per sign engineering.

Exterior grade transparent colored digital print with U.V. inhibitors for exterior use and adhesive backing applied to #7238 white acrylic panel.
1" continuous piano hinge

Welded 1/4" wall aluminum angle door frame with seams welded, grounded and filled smooth or hairline seams. All visible of door framing to be painted.

Fabricated .090 aluminum cabinet with painted finish. Seams welded, grounded and filled smooth or hairline seams. Cabinet interior to be painted.

Welded 1/4" wall aluminum angle door frame with seams welded, grounded and filled smooth or hairline seams. All visible of door framing to be painted.

Stainless steel countersunk mechanical fasteners.

1/4" thick clear lexan door face 3/8" thick #7329 white acrylic with surface applied translucent colored digital map and copy with U.V. inhibitors. Use translucent vinyl diffuser on back if necessary to achieve even illumination.

Internal back light fluorescent lamps with interior wireway. Cabinet interior not visible from outside to be painted white.

1" x 1 1/2" aluminum flat bar lexan retainer frame fastened to back of aluminum door facing with countersunk screws.

Concrete footing with integral colored concrete mow pad as per sign engineering.

**SIGN TYPE PRIMARY FREESTANDING DIRECTORY W40**
Single face fabricated aluminum cabinet with 1/4" thick clear lexan face. Cabinet to be painted on all sides with silkscreened logo on header.

Expansion wall anchors with countersunk mechanical fasteners. Cylinder lock with key.

Welded 1/4" wall aluminum angle door frame with welds ground and filled smooth.

1/2" thick Komatex white foam vinyl sheet or equivalent with surface applied digital colored graphic print with U.V. inhibitors for exterior use.

1/2" thick welded aluminum drilled and tapped spacer bars for attaching map panel.

Digital print graphic panel with U.V. inhibitor.

Fabricated .080 aluminum cabinet painted inside and outside surfaces.

1/4" thick clear lexan.

Expansion wall anchors with countersunk mechanical fasteners.

1 1/2" wide, 1/4" thick, aluminum flat bar spacer frame welded to cabinet back. Drill and tap behind door frame to attach graphic panel. All hardware to be concealed behind door frame.
Single face fabricated aluminum cabinet with 1/4" thick clear lexan face. Cabinet to be painted on all sides with silk-screened logo on header.

1/4" thick #7238 white acrylic with translucent colored digital print with U.V. inhibitors applied to face. Apply white 3M translucent vinyl diffuser to back, if required, to ensure even illumination.

Fabricated .090 aluminum cabinet painted inside and outside surfaces.

Finished grade / floor

All mechanical fasteners to be stainless steel.

1.1 continuous piano hinge

1/4" thick clear lexan

1/2" thick Komatex white foam vinyl sheet or equivalent with surface applied digital colored graphic print with U.V. inhibitors for exterior use.

Fluorescent slimline lamps with wireways.

Expansion wall anchors with countersunk mechanical fasteners.

Primary power by others.

1/4" thick #7238 white acrylic with translucent colored digital print with U.V. inhibitors applied to face. Apply white 3M translucent vinyl diffuser to back, if required, to ensure even illumination.

Welded 1/4" wall aluminum angle door frame with welds ground and filled smooth.

3/4" x 1 1/2" rectangular aluminum framed retainers mechanically fastened door frame with drilled and tapped countersunk screws.

Option: Illuminated cabinet

Expansion wall anchors with stainless steel countersunk mechanical fasteners.

Cylinder lock with key.

1/2" thick  #7238 white acrylic with translucent colored digital print with U.V. inhibitors applied to face. Apply white 3M translucent vinyl diffuser to back, if required, to ensure even illumination.

Fluorescent slimline lamps with wireways.

Expansion wall anchors with countersunk mechanical fasteners.

Aluminum "Z" retainer frame.

Primary power by others.
Exterior grade transparent colored digital print with U.V. inhibitors and adhesive backing applied to #7238 white acrylic panel.

Single face fabricated .090 aluminum cabinet with 1/4" thick clear lexan face. Cabinet to be painted on all sides with silkscreened logo on header. Cabinet to have interior edge light illumination.

Fabricated aluminum attachment brackets with painted finish.

Concrete footing with integral colored mow pad as per sign engineering.

Coat embedded aluminum with alkali resistant bituminous paint.

Ease edges ±3/16" radius.
1" continuous piano hinge

Cylinder lock with key.

3 1/2" Ø aluminum sphere with 1/4" Ø all thread steel stud for attaching to top base cap. Sphere to be painted.

3" Ø x .216" wall aluminum pipe with 6 1/2" Ø, 3/4" thick welded decorative aluminum base plate. Pipe and plate with painted finish.

3/8" thick #7328 white acrylic with surface applied translucent colored digital map and copy with U.V. inhibitors. Use translucent vinyl diffuser on back if necessary to achieve even illumination.

3" Ø x .216" wall aluminum pipe with 6" x 8" x 3/8" welded aluminum plate. Coat embedded aluminum with alkali resistant bituminous paint.

Concrete footing with integral colored concrete mow pad as per sign engineering.

Conduit with primary power to sign by others.

1/4" thick header panel with side returns with painted finish.

Fabricated .090 aluminum cabinet with painted finish. Seams welded, grounded and filled smooth or hairline seams. Cabinet interior to be painted.

Welded 1/4" wall aluminum angle door frame with seams welded, grounded and filled smooth or hairline seams. All visible of door framing to be painted.

Stainless steel countersunk mechanical fasteners.

1/4" thick clear lexan door face

3/8" thick #7328 white acrylic with surface applied translucent colored digital map and copy with U.V. inhibitors. Use translucent vinyl diffuser on back if necessary to achieve even illumination.

Internal back light fluorescent lamps with interior wireway. Cabinet interior not visible from outside to be painted white.

1" x 1 1/2" aluminum flat lexan retainer frame fastened to back of aluminum door facing with countersunk screws.

**ELEVATION**
- 3/4" = 1'-0" Scale
- UCR logo colors: 1 and 2
- Floorstanding 19" LCD informational display and surrounding steel enclosure with painted finish. See specification sheet on drawing 1.33. All installation requirements to be supplied by Product Manufacturer.
- Primary power to LCD display by UCR Riverside.
- Concrete footing as required by Sign Contractor's engineering.

**SIDE VIEW**
- 3/4" = 1'-0" Scale
- 1/2" thick aluminum letters with painted finish. Drilled and tapped with hidden stainless steel studs on bottom of letters.
- Stainless steel structural support gussets with vertical brushed finish.
- Fabricated stainless steel pole cover with vertical brushed finish. Note: no oil canning / waving of faces allowed.
- 3M scotchcal vinyl decal and letters.

**DETAIL SECTION**
- 1" square aluminum tube welded support structure.
- 1/2" thick stainless steel roof support plates.
- 1/2" thick aluminum plate side bracing on each side and front. Back open for draining.
- Corrugated aluminum roof panelling.

**DRAWINGS** 1.39
Product Name: Sliivr (sli-ver)  Type: Floorstanding

DESCRIPTION:
Proof that true beauty is more than skin deep. The stunning 19” LCD display is highlighted by the architecture of the surrounding steel enclosure. The internal peripherals are designed for quick cold swapping and easy, preventative maintenance. Designed to be the perfect informational kiosk, the Sliivr is the choice for free standing directory, way-finding and in-store cataloing applications.

DIMENSIONS:

INCLUDED W/ BASE MODEL:
- 19” LCD Display
- Powder Coated Steel Side Accent Blanks
- Large Access Doors with Tubular Locks/Mogs
- Tempered Glass Display Overlay (Certain W Options Only)
- Cooling Fan
- Industrial Power Strip
- 2.5 Watt Speakers / 8 Ohm Impedance

SPECIFICATIONS:
- Precise cut, 16 gauge steel enclosure
- Full Interior MIG Welds / Custom Brackets & Mounts
- Cardinal Industrial Powder Coat Finish
- Kiosk Temp Range:
  - Operating: 40-80°F
  - Storage: 33-100°F

OPTIONS:
- Installation / Warranty
- Custom & Off-The-Shelf Software
- PC & PC Upgrades
- Branding & Graphics
- Accent Blade Color Options
- Multimedia
- Custom Finishes
- User Input Devices
- Card Readers / Scanners
- Custom Component Integration
- Shipping & Delivery

1. Symbol on both sides

2. 1/4" thick acrylic sanded edges. Surface painted background and 3M vinyl symbol.

3. Aluminum bracket with milled channel to insert acrylic graphic panel.

4. Drill and top bracket for countersunk attachment screws at top and bottom, painted to match bracket.

5. Countersunk mounting screws with appropriate expansion wall anchors located at top and bottom of bracket.

GENERAL NOTES:

1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.
GENERAL NOTES:

1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

3. Braille shall be Calif Grade 2 (Contracted Braille).

4. An inverted "L" shall precede all numbers in Braille.
GENERAL NOTES:
1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.
2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.
3. Braille shall be Calif Grade 2 (Contracted Braille)
4. An inverted "L" shall precede all numbers in Braille.

Attach to backer panel with 3M VHB tape. Use minimal for possible removal.

Existing glass 3M scotchcal gray vinyl backing on back of glass to conceal mounting tape.

Attach to backer panel with 3M VHB tape.

3M scotchcal gray vinyl backing on back of glass to conceal mounting tape.

Attach to backer panel with 3M VHB tape. Use minimal for possible removal.

1/4" x 1/8" thick acrylic bar with painted finish. Attached with 3M VHB tape.

1/4" thick acrylic undersized panel with polished and painted surface.

1/4" thick etched panel with 1/32" raised copy, California grade 2 braille and "rule".

1/8" thick clear acrylic face with polished edges. Heavy paper digital insert by others.

1/16" clear acrylic backer with subsurface painted background.

1/4" clear acrylic undersoned panel with polished and painted surface.

1" Ø thumb notch in backer panel for paper removal.

Surface painted band

1/32" plastic fill attached with 3M VHB tape.

1/4" Typ.
1. Copy shown on typical layouts only, actual layout to be determined and/or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

3. Braille shall be Cal Grade 2 (Contracted Braille).

4. 3/16" tolerance provided at top and bottom for paper insert.

5. An inverted "L" shall precede all numbers in Braille.

CORRECTION TO CAMPUS SIGN PROGRAM
DRAWING 1.63X (REPLACES DRAWING 1.63)

AUTHORIZED BY:

TIMOTHY RALSTON
ASSOCIATE VICE CHANCELLOR
CAREER RESOURCE MANAGEMENT
UNIVERSITY OF CALIFORNIA, RIVERSIDE

JULY 12, 2011
GENERAL NOTES:

1. This sign is to be fabricated identical to sign type B32 in all respects with the exception of the following:
   a. Overall width will be 11".
   b. Overall height will be 11 5/8".

2. For all additional details refer to DWG. 1.63X of the 2008 CAMPUS SIGN PROGRAM.
GENERAL NOTES:

1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

3. Braille shall be Calif Grade 2 (Contracted Braille).

4. An inverted "L" shall precede all numbers in Braille.

1/4" x 1/4" square aluminum bar raised 1/8" above etched background and eased edges. Attached with concealed fasteners threaded and taped from back light sandblast finish.

1/4" thick etched photopolymer panel with 1/32" raised copy and California Grade 2 braille.

Silkscreened symbol and "rule".

Attach to wall with 3M VHB tape and silicone adhesive.
GENERAL NOTES:

1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

**Horizontal Map Layout**

**LOCATION ELEVATION**

| 3/8"=1'-0" |
1/4" thick clear matte acrylic with eased and smooth sanded edges. Surface painted background and 3M Scotchcal vinyl symbol.

Attach to door with 3M VHB tape and silicone adhesive.

Ease edges to prevent individuals from cutting themselves.
GENERAL NOTES:

1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

3. Braille shall be Calif Grade 2 (Contracted Braille).

4. An inverted "L" shall precede all numbers in Braille.

Mounted to wall with 3M VHB tape and silicone adhesive.

1/4" thick photopolymer etched panel with 1/32" raised copy, California grade 2 braille.

1/4" x 1/4" square aluminum bar raised 1/8" above etched background and eased edges. Attached with concealed fasteners threaded and taped from back, light sandblast finish.

Mounted to wall with 3M VHB tape and silicone adhesive.

1/4" thick photopolymer etched panel with 1/32" raised copy, California grade 2 braille.

1/4" x 1/4" square aluminum bar raised 1/8" above etched background and eased edges. Attached with concealed fasteners threaded and taped from back, light sandblast finish.
GENERAL NOTES:

1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

STAIR 2
NO ROOF ACCESS

1 THROUGH 7

1/4" thick acrylic with eased and smooth sanded edges. Surface painted background and silkscreened graphics.

Mounted to wall with 3M VHB tape and silicone adhesive.
GENERAL NOTES:
1. Copy shown as typical layouts only, actual layouts to be determined and verified prior to fabrication.
2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

MAXIMUM OCCUPANCY
000

1/4" thick acrylic with eased and smooth sanded edges. Surface painted background and silkscreened graphics.

Mounted to wall with 3M VHB tape and silicone adhesive.

Maximum number to vary as per room and to be determined by Fire Marshal.
THIS DOOR TO REMAIN UNLOCKED WHenever THE BUILDING IS OCCUPIED

Computer cut 3M Scotchcal vinyl copy with color being gray or white as determined by existing surface color.

Center Copy
1/4" thick acrylic with eased and smooth sanded edges. Surface painted background and silkscreened graphic.

Mount to wall with 3M VHB tape and silicone adhesive.

3M scotchcal gray vinyl backing on back of glass to conceal mounting tape.

Alternate existing glass condition.
GENERAL NOTES:

1. Copy shown as typical layouts only, actual layouts to be determined and/or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

3. Braille shall be Calif Grade 2 (Contracted Braille).

1/4” thick acrylic with eased and smooth sanded edges. Surface painted background and silkscreened graphics.

3M scotchcal gray vinyl backing on back of glass to conceal mounting tape.

Mount to wall with 3M VHB tape and silicone adhesive.

Alternate existing glass condition.

ACCESSIBLE ENTRANCE LOCATED ON SOUTH SIDE OF BUILDING
1/2" thick Komacel integral foam vinyl sheet with sealed and sanded sides. Paint all visible surfaces and apply graphics with 3M Scotchcal computer cut vinyl.

Attach to door with concealed threaded hanger studs and silicone adhesive. Place stud in each corner.

GENERAL NOTES:
1. Copy shown as typical layouts only, actual layouts to be determined and or verified prior to fabrication.

2. Sign installer to verify existing mounting conditions and use appropriate attachment method as per condition.

Location Plans and Messages

In order to provide clarity to the pedestrian sign type locations, the following plans only show Pedestrian Directional sign types.

Included are the following sign types:
W30
W35
E. Pedestrian Directional Signs

Pedestrian Legend
- Primary Pedestrian Circulation
- Secondary Pedestrian Circulation
- Existing Directory
  (new directories to replace existing)
- Existing Postings
- Parking Lot Permit Zones

Pedestrian Directional
- W30 Blade Sign
- W35 Wall Mount

Note:
Location orientation does not necessarily represent accurate sign placement.

Pedestrian Destinations
- Direct from Perimeter of Campus
  - Commons
  - Hinderaker Hall
  - Humanities 1900
  - Life Sciences 1500
  - Physics 2000
  - Univ. Lecture Hall
  - Watkins 1000

- Direct from Parking Lots
  - Alumni Visitor Center
  - Barn Group (Lots 1, 2, 34)
  - P.E. Building (Lots 1, 24)
  - Studio Theater (Lots 1, 2, 24)
  - University Theater (Lot 30)

- Direct from 2 - 3 decisions points away
  - Bookstore
  - College Bldg North and South
  - Env. Health & Safety
  - Extension/East Campus
  - Lot 1, 2, 24
  - Lot 24
  - Lot 30
  - Police Dept.
  - Student Recreation Center
  - P.E. Building
  - Health Services
  - West Campus
F. Pedestrian Directional Signs
