   --- | ---
   1-1 | **Question:** How will the project be phased? Are we allowed to turn off everything or only a limited number of units can be done at once?  
   **Answer:** There will be (2) phases for the project. The awarded contractor will work with the University on shutdowns of the building and sequencing of demo of old units/installation of the new units.
   1-2 | **Question:** Since we are to remove old equipment and modify concrete pads/ openings for 95% of the units, some down time will be accruing for the concrete to dry-out and roofing to be complete. Will you require any temp cooling?  
   **Answer:** Temporary Cooling is not required.
   1-3 | **Question:** Will you have any duct cleaning requirement for the existing ductwork?  
   **Answer:** Cleaning for the existing ductwork is not required.
   1-4 | **Question:** What is the extent of the fire protection scope of work? What is the current system, is it JCI fire?  
   **Answer:** Several units will require duct mounted smoke detectors. Coordinate with the University regarding the existing fire system. Johnsons Controls, Inc. is the Fire Alarm Vendor; contact James Jack at (909) 278-5649
   1-5 | **Question:** Spec section 23 0910, indicates “Facility Monitoring System” Considering this building is not a lab, will this section be required? If required, drawings do not show anything about that.  
   **Answer:** Spec section 23-0910 covers DCV, and various sensor types to be installed both in the space and in the ductwork. Because of this, yes, this spec
section will be required. Plans indicate what is required, exact placement is means and methods of the controls contractor.

| 1-6 | Question: With the current delays and issues with Supply Chain can the project duration be increased from 105 days to 180 Days? | Answer: We want to understand the lead time for equipment once the order has been placed and use the time line as a basis for extending the construction contract schedule. |
| 1-7 | Question: The structural steel/cage surrounding the RTU's will require dismantling to allow the lifting of the equipment, will a Special Inspection be required for the re-installation? | Answer: Special Inspection is not required for re-installation of the mechanical screen structure. |
| 1-9 | Question: During the site visit it was difficult to locate the VAV’s where they are shown on the drawings, can the maintenance dept. locate the actual VAV locations prior to construction? | Answer: Yes, Facilities Services will assist in identifying the location of the VAVs. |
| 1-10 | Question: Will the roof support staging all the new RTU’s on the roof while the existing units are still in place? | Answer: The existing equipment should be removed prior loading with the new equipment. The roof is not designed to accommodate both the existing and new units concurrently. |
| 1-11 | Question: What are the allowable building shutdown durations or is will there be phasing from floor to floor or throughout the offices? | Answer: There will be (2) Phases to allow for building shutdown and sequencing of demo of old units/installation of new units. Shutdowns lengths vary. Awarded contractor to work with the University. |
| 1-12 | Question: If we are working in an office over several days will daily cleanup be required in that space? | Answer: Daily clean up is required if the space is occupied; However if there is a planned duration for the space being worked in, it can be reviewed by the University for flexibility on this. |
| 1-13 | Question: Will the contractor have full access to each office that a VAV is located? | Answer: Yes, full access will be given to the spaces where the VAVs are being replaced. |
| 1-14 | Question: During the site visit we noticed spray fireproofing the ceiling decks, can the University confirm there are no hazardous materials in any of the work spaces? | Answer: Skye Hall does not have hazardous materials. |
